[pjimena-dev.vercel.app](#)

CORE EXPERTISE

- Full-stack web application development
- Responsive and accessible user interfaces
- Server-side logic and REST API integration
- Relational database design and optimization
- Authentication and role-based access control
- Admin dashboards and business workflows
- Production debugging, deployment, and support

TECHNICAL STACK

Frontend
Next.js, React, TypeScript, JavaScript, Tailwind CSS

Backend
Node.js, Server Actions, REST APIs, Python / Flask

Database
PostgreSQL, Neon DB, Supabase, SQL Server

Enterprise
VB.NET, DevExpress, Crystal Reports

Tools
Git, GitHub, Vercel, Render, VS Code, Visual Studio

EDUCATION

Bachelor of Science in Computer Engineering
Bestlink College of the Philippines
Graduated 2022

PROFESSIONAL VALUE

- 3+ years of professional software development experience
- Promoted from entry-level to mid-level programmer
- Enterprise systems and modern web development background
- Direct ownership of requirements, fixes, and production support

PROFESSIONAL PROFILE

Software developer with 3+ years of professional experience building, maintaining, and supporting enterprise business systems, plus hands-on experience creating complete web applications using Next.js, React, TypeScript, Node.js, PostgreSQL, and Tailwind CSS. Experienced across the development lifecycle - from requirements analysis and database design to responsive UI development, business logic, testing, deployment, and production support. Strong background in SQL Server, stored procedures, VB.NET, Crystal Reports, and DevExpress.

PRIMARY TECHNOLOGIES

Next.js

React

TypeScript

PostgreSQL

Node.js

Tailwind CSS

SQL Server

PROFESSIONAL EXPERIENCE

Mid-Level Programmer

SEP 2023 - PRESENT

Moylan's Insurance Brokers, Inc. | Makati City

- Develop and enhance enterprise applications supporting accounting, underwriting, receipting, reporting, and financial operations.
- Design, maintain, and optimize SQL Server stored procedures, complex queries, validations, and production data workflows.
- Build and improve desktop interfaces using VB.NET and DevExpress while maintaining Crystal Reports for operational and management reporting.
- Work directly with business users to gather requirements, clarify process rules, reproduce issues, and deliver practical system improvements.
- Perform end-to-end troubleshooting across user interface, application logic, database records, stored procedures, and reports.
- Support testing, deployment, controlled data correction, post-release validation, and ongoing production maintenance.

Entry-Level Programmer

SEP 2022 - SEP 2023

Moylan's Insurance Brokers, Inc. | Makati City

- Built and maintained insurance business applications using VB.NET, SQL Server, Crystal Reports, and DevExpress.
- Provided end-user support, data validation, application maintenance, and production issue resolution.
- Promoted after consistently delivering reliable solutions and demonstrating ownership of assigned modules and concerns.

DEVELOPMENT CAPABILITIES

- Frontend
- Responsive layouts, reusable components, form workflows, dashboards, tables, charts, and mobile-friendly interfaces.
- Backend
- Server-side business logic, route handlers, server actions, validation, API integration, and email notifications.
- Database
- Schema design, CRUD operations, relationships, transactions, stored procedures, performance tuning, and data integrity.
- Delivery
- Environment configuration, Git-based workflow, Vercel and Render deployment, debugging, and production maintenance.

DEVELOPMENT APPROACH

- Translate business requirements into clear technical workflows
- Design maintainable interfaces, backend logic, and database structures
- Validate edge cases, permissions, calculations, and data consistency
- Deploy, monitor, troubleshoot, and improve based on user feedback

SELECTED FULL-STACK PROJECTS

- Full Resort Management & Online Booking System

Next.js | TypeScript | PostgreSQL | Tailwind CSS | Vercel

LIVE DEMO

Built a public booking experience and administration platform covering room management, availability, pricing, blackout dates, booking workflows, reports, and operational controls.
- Student Registration System

Next.js | TypeScript | PostgreSQL | Nodemailer

LIVE DEMO

Developed student, course, subject, and enrollment modules with CRUD workflows, status management, dashboard analytics, and automated email notifications.
- PC E-Commerce & Admin Platform

Next.js | TypeScript | PostgreSQL | Authentication | Vercel

LIVE DEMO

Created a product catalog, account registration, cart, checkout, order tracking, stock display, and role-based admin tools for inventory and order management.
- HR Employee Management System

Next.js | TypeScript | PostgreSQL | Tailwind CSS

Designed employee records, attendance, payroll workflows, role management, analytics dashboards, and administrative controls for HR operations.
- POS & Inventory System

Python | Flask | PostgreSQL | Jinja | Render

Implemented point-of-sale processing, receipt generation, inventory updates, product monitoring, transaction history, and sales reporting.

FULL-STACK STRENGTHS

- Business-Focused Engineering

Builds software around real operational workflows, controls, validations, and user needs.
- End-to-End Development

Works across interface, backend logic, database, deployment, and production support.
- Database Depth

Strong SQL Server background combined with practical PostgreSQL application development.
- Production Mindset

Prioritizes reliability, maintainability, data accuracy, troubleshooting, and user adoption.

VALUE FOR FULL-STACK DEVELOPMENT

Combines professional enterprise-system experience with modern full-stack development skills, allowing complex business requirements to be translated into responsive interfaces, reliable backend logic, well-structured databases, and deployable production solutions.
